

Stratevo Consulting Inc., founded in 2009, specializes in consulting services in management and technology. Our approach allows organizations to reach their goals by providing assistance in the definition of their business and IT strategies and seeing to their implementation.

Our Services

Added Value

- **Implementation of the proposed strategies**
 - Assistance and representation of our customers at each stage of the business transformation to ensure that the expected objectives are achieved.
- **Independence with the solution publishers and the integrators** to ensure our integrity when representing our customers as part of the decision-making process (no revenue from license sales and maintenance of solutions).
- **Change Agent**
 - Business units' mobilization as part of major enterprise transformation initiatives involving technologies.
- **Multidisciplinary Expertise**
 - Operations management, accounting, strategy and information technology.
- **Work experience in business transformation through various companies**
 - Participation in the development of the business and technological foundation, including the implementation of ERP and business warehouses, the creation of shared service and excellence centers and the optimization of business processes.
 - **Several business transformation scenarios** have been developed to take into account the different business and organizational contexts (e.g. transformation goal, enterprise size, etc.).
 - **Governance of business transformation programs**, ERP implementation projects and development of business intelligence and analytics solutions.

- Participated in the **evaluation of several business initiatives** and technological solutions as well as the achievement of "*proof of value*" to ensure the relevance of the investments for the organization.
